STURDY ONE YEAR VINES
AND CUTTINGS

From

The Largest Private Collection
in the
United States

You can now grow beautiful, delicious grapes that will be the envy of your neighbors—equal in quality and appearance with the best that you can buy. And should you like to have your own wine, at almost no cost, you can grow wines that will compare favorably with the best the stores have to offer.

This is possible now because many new varieties—new to this country—have been imported from France. We have imported over 400 varieties, many of which will not be available to our customers for several years.

The only way to learn about them is to grow them. I could talk about them for hours, but until you yourself observe their vigor, disease resistance, productivity and wonderful quality, my words would be meaningless.

OUR SALES POLICY

We prepay shipping charges and guarantee delivery in good condition, but our responsibility for the growth of your vine ends there, as we have no control over the care you will give them. Notify us immediately upon receipt, if everything is not as it should be. Should vines prove not true to name, our responsibility is limited to replacement of stock. Vines are shipped pre-pruned and ready to plant. Terms are cash with order. Kansas buyers add 2% Sales Tax. Quantity prices apply only to a single variety—thus 10 for \$6 means 10 Beta, for example, not 5 Beta, 3 Columbian and 2 Dutchess. Planting, pruning, and training instructions will be sent with your vines. Should you wish help in selection of varieties, kindly state whether you wish to grow for wine, the table, market, etc.; tell us something about your soil—the more complete your information, the better. Enclose a stamped and addressed envelope.

Gradually, through the cooperation of our friends and customers, we are accumulating confirmation of the adaptability of these splendid hybrids—even in places where the grape has been considered an impossibility. We want to know how your planting progresses, everything that happens to it—your opinion of the vines and their fruit. In return, we will be glad to advise you upon any new problem you may have in connection with them, and keep you informed of new and better varieties.

Two good books on the grape are available. "A Wine Grower's Guide" by Philip M. Wagner, (3.00) and "Grapes and Wines from Home Vineyards" by U. P. Hedrick, (4.00). Prices are postpaid. Kansas buyers add 2% Sales Tax.

Graftable cuttings may be obtained at 60% of the vine prices. Such cuttings should be ordered before January 1.

HYBRIDS OF SEYVE-VILLARD

5-276 Gold, early. Very vigorous and disease resistant. Heavy production. Large clusters, medium berries, very sweet. Makes an excellent white wine and is excellent to eat. Produces the second year. 75c each, 10 for \$6.50, 100 for \$55. Prune short.

12-303 Gold, late midseason. Very vigorous, resistance excellent. Heavy producer of large loose bunches, large round berries with firm flesh. Good for wine and the table. Prune short. \$1.25 each, 3 for \$3.50.

12-327 Black, midseason. Very vigorous, good disease resistance. Heavy producer of large compact clusters with large juicy round berries. High sugar content (25%). Excellent for wine. Prune short. \$1.25 each, 3 for \$3.50, 10 for \$11.00.

12-328 Black, midseason. Good vigor, fair resistance. Heavy producer of large compact clusters, very large ovoid berries. An excellent table grape. \$1.25 each. Prune short.

12-347 Black, early midseason. Very vigorous, good resistance. Clusters of good size with large ovoid berries. Suitable for both wine and table. Prune long. 75c each, 10 for \$6.50.

12-358 Gold, late Midseason. Good vigor, very good disease resistance. Beautiful loose clusters with large ovoid berries, firm and crisp flesh. Makes a fine table and shipping grape. Prune short. \$1.25 each, 3 for \$3.50, 10 for \$11.00.

12-364 Gold, late. Vigorous, resistance fair (susceptible to anthracnose). Very large clusters of large pointed berries, quite compact. Not suitable where temperature goes to -15 F. or lower and requires a long hot season for maturity. Prune short. \$1.25 each, 3 for \$3.50, 10 for \$10, 100 for \$75. An excellent table grape.

12-375 Gold, late midseason. Extremely vigorous and very disease resistant. Very heavy production of large loose clusters of large oval berries. A fine table grape, makes a neutral white wine. Has one of the most beautiful and easily cared-for vines in the vineyard. Prune short, or long, and thin to best clusters. \$1.25 each, 3 for \$3.50, 10 for \$10, 100 for \$75, 1000 for \$650.

12-391 Black, midseason. Good vigor, excellent resistance. Very heavy production of magnificent compact clusters with very large ovoid berries, crisp and delicious. Requires good soils for sustained production. Prune short. \$1.50 each, 3 for \$4.00.

12-401 Black, late midseason. Vigor medium, resistance good. Heavy production of large compact conical clusters, large round berries of good quality. Good to eat and wine is excellent. Prune short. \$1.25 each.

12-413 Gold, late midseason. Good vigor, resistance. Very heavy production, very large clusters of large berries. Good wine and good to eat. Susceptible to anthracnose. Must have hot growing season. Prune short. \$1.25 each, 3 for \$3.50, 10 for \$10.00.

14-287 Gold, very early. Muscat. Fair vigor, good resistance. Heavy production, fairly compact clusters, berries round, below medium, excellent to eat. Wine very good, cleanly Muscat, very alcoholic. Prune short. \$1.25 each, 3 for \$3.50, 10 for \$10.00.

15-403 Black, fairly early. Vigor medium, very resistant. Heavy producer of long compact clusters, medium to large round berries. Good wine of light color. Should have good soil. Prune short. \$1.25 each, 3 for \$3.50, 10 for \$10.00.

15-505 Gold, fairly early. Good vigor and resistance. Heavy producer of long loose clusters, will hang a long time on the vine after

ripening. Round berries medium or below. Wine of good quality. Prune short. \$1.25 each, 3 for \$3.50.

18-315 Black, fairly early to midseason. Remarkable variety, has great vigor, high resistance and very heavy production. Large clusters, fairly compact, with large ovoid berries, three or four to the shoot. Wine is very good. One of the best. \$1.25 each, 3 for \$3.50, 10 for \$10. Prune short.

23-18 Black, late midseason. Very vigorous, good resistance. Clusters are large, loose, with very large berries. Wine is good. Production is very good. Prune short. \$1.25 each, 3 for \$3.50.

23-657 Black, early midseason to midseason. Very vigorous, resistance excellent. Very large, long loose clusters of medium ovoid berries, very rich in sugar and delicious. (24 to 28%). Prune short. \$1.50 each, 3 for \$4.00, 10 for \$12.00.

HYBRIDS OF SEIBEL

1 Black, midseason. Good vigor and resistance. Small clusters of medium berries. Good wine and should be excellent for jelly. Prune long. 50c each, 10 for \$4.00.

2 Black, midseason. Good vigor and resistance. Small clusters of medium berries. Good wine and probably jelly. Prune long. 50c each, 10 for \$4.00, 100 for \$35.00.

2653 Gold, midseason. Very beautiful table grape with large loose clusters of very large berries. Good shipper. Vigor good, resistance fair. \$1.25 each, 3 for \$3.50.

4643 Black, midseason. Very vigorous, resistance fair. Very heavy producer, fairly large clusters of medium berries. Makes a good ordinary wine and comes into bearing early. Prune short to long depending on soil and vigor. 75c each, 3 for \$2.00, 10 for \$6.00.

5279 Gold, very early. Extremely vigorous and resistant. Heavy producer of an excellent family or local market table grape. Does not rot and will hang on vine a long time. Wine is excellent and rich. Prune short to long. \$1.25 each, 3 for \$3.50, 10 for \$10.00.

5409 Gold, early. Vigorous and very resistant. Does not rot. Very heavy producer of an excellent table grape and its wine is excellent. \$1.25 each, 3 for \$3.50.

5455 Black, early. Very vigorous, resistance fair. Heavy and regular production, long heavy clusters of medium to small berries. Wine is very good. 75c each, 10 for \$6.50, 100 for \$55.00.

5813 Red, late. Very vigorous, resistance fair but subject to anthracnose. An excellent table grape—long clusters of large round berries. Very heavy production. Prune short \$1.25 each.

5860 Gold, fairly early. Vigorous, excellent table and wine grape without spraying. Prune long. 75c each, 3 for \$2.00, 10 for \$6.00.

5898 Black, fairly early. Has excellent possibilities for many purposes. Is quite vigorous and productive.

6905 Black, midseason. Vigorous and resistant. Good clusters of

medium berries. Very heavy producer of a wine of remarkable quality. Prune very short. Don't let overbear, especially when young. 75c each, 3 for \$2.00, 10 for \$6.00.

7053 Black, early. Very vigorous, resistance fair. Very heavy producer of long clusters of medium berries, electric blue in color. Wine is very deeply colored, heavy bodied and good. Prune short. 75c each, 3 for \$2.00, 10 for \$6.00, 100 for \$55.00, 1000 for \$500.00.

7349 Black, early. Vigorous, resistance fair. Good clusters, clean flavor. May be pruned long. 75c each, 3 for \$2.00, 10 for \$6.00.

8357 Black, midseason. Excessively vigorous, good resistance. Medium to heavy production on long pruning. Long compact clusters of medium round berries. Has very intense color—10% of S 8357 and 90% white wine will give a beautiful ruby red. Adaptable to all the usual rootstocks. \$1.25 each, 3 for \$3.50.

8365 Black, fairly early. Medium clusters of medium to large berries of very fine flavor. Makes a very fine wine and are mighty good to eat. Prune short or half-long. \$1.25 each, 3 for \$3.50.

8616 Black, midseason or later. Extremely vigorous, good resistance but subject to rot. Fair production. Good clusters of large round berries. Prune short. 65c each, 3 for \$1.75, 10 for \$5.00.

8745 Black, early. Very heavy production, vigorous and fair resistance. Makes an excellent well colored wine and are not bad eating. 75c each, 3 for \$2.00, 10 for \$6.00. Prune short.

9110 Gold white, midseason. Vigor and resistance medium. Heavy producer of beautiful loose clusters, large ovoid berries. Makes a wonderful table grape and an excellent white wine. Has seeds but they are not noticeable in eating. May be pruned long if crop is regulated. \$1.25 each, 3 for \$3.50.

10076 Gold, early. Very vigorous. Fair resistance. Good producer of an excellent white wine. It is also a good table grape. Prune short. \$1.25 each.

10096 Black, midseason. Vigorous and fairly resistant. Remarkable large and long clusters of small to medium berries. Good wine. Prune short. 75c each.

10173 Gold, fairly early. Good vigor, fair resistance. Medium producer of a very good wine. \$1.00 each, 3 for \$2.50.

10417 Gold, very early. Good vigor, fair resistance. Beautiful clusters of large berries. An excellent table grape. Prune short. 75c each, 3 for \$2.00, 10 for \$6.00.

10868 Gold, early. Vigorous, resistant. Medium producer but makes a very rich wine of superior quality. Prune according to vigor. \$1.25 each, 3 for \$3.50, 10 for \$10.00.

10878. Black, early. Very vigorous, resistance fair. Heavy producer of small to medium clusters of small to medium berries. Makes a remarkably good wine. Prune long. \$1.25 each, 3 for \$3.50, 10 for \$10.00.

11803 Rose, early midseason to midseason. Vigor medium, resistance

good. Very heavy producer of large compact clusters of beautiful large crisp round berries of excellent flavor. A really fine table grape and makes an excellent pink wine. \$1.25 each. As this is one variety which should be grafted, we are offering a few vines on several stocks at \$2.00 each, limit one to a customer. Prune short.

12583 This is not the correct number for the variety, but the one it was imported under. It is a black, fairly early. The vine is extremely vigorous and productive. Try it. 50c each.

13053 Black, very early. The first to ripen. Very vigorous and resistant. Heavy producer of long medium clusters of small to medium berries. Makes a very good wine and is especially recommended for the more northern locations. Prune long or short, according to vigor. 75c each, 10 for \$6.50, 100 for \$55.00.

13680 Gold, midseason. Very vigorous, good resistance. Clusters very compact, but does not rot. Very fine flavor. Prune short. Production medium. \$1.25 each, 3 for \$3.50.

14189 Black, early. Very resistant and vigorous. Large clusters, medium berries. Excellent wine. Very fine. \$1.25 each. Prune short.

14483 Black, late midseason. Very large compact clusters, very healthy, clean tasting and juicy. Prune short. \$1.25 each.

14596 Black, midseason. Vigorous and resistant. Good clusters of good berries and heavy production. An excellent wine variety of much promise. Prune short. \$1.25 each.

14639 Gold, midseason. Has large clusters of good sized berries, is quite promising.

14654 Gold, early. Fairly vigorous and resistant. Heavy producer of over medium clusters. Large ovoid berries. For the table. Prune short. \$1.25 each.

14665 Gold, early midseason. A beautiful cluster and large berries, very fine table variety. Prune short. \$1.25 each.

14660 Gold, midseason. Vigorous. Produces large clusters of ovoid berries. Good table grape. \$1.00 each, 3 for \$2.50.

14709 Gold, early midseason. Vigorous, resistant. Very long clusters of medium berries. \$1.00 each, 3 for \$2.50.

15062 Black, midseason or earlier. Vigorous and healthy. Very heavy production of fine clusters of large berries, compact. Fine flavor. A really excellent table grape. Prune short. \$1.50 each.

OTHER FRENCH-AMERICAN HYBRIDS

Ravat 34 Gold, midseason. Good vigor, fair resistance. Medium clusters of good sized oval berries of very good table quality. Prune short. 75c each, 3 for \$2.00, 10 for \$6.00.

Baco 1 Black, early midseason. Extremely vigorous and very resistant. Heavy production of medium clusters of small to medium ber-

ries. Makes a very good red wine and should be fine for an unfermented juice. 75c each, 3 for \$2.00. Prune long.

Couderc 13 Gold, late midseason. Very vigorous and resistant. Heavy production of over-medium clusters of medium berries. Has an unusual melon-like flavor and made a wonderful sweet wine. Good to eat, too. 75c each, 3 for \$2.00, 10 for \$6.00, 100 for \$55.00. Prune short.

Couderc 4401 Black, early midseason to early. Extremely vigorous, resistant and productive. Small to medium clusters of small berries. Four-year vines averaged over 30 lbs. to the vine. Makes a so-so wine, a wonderful pasteurized juice of intense color and fine jelly. A *rupestris* x *vinifera* cross, it retains the wild flavor sought for in jellies. 75c each, 3 for \$2.00, 10 for \$6.00. Prune long.

Couderc 7120. Black, late midseason. Medium vigor, very resistant. Heavy production—sometimes 5 clusters on a shoot. Medium to small, very compact clusters of medium berries. Makes a good solid ordinary red wine, excellent pasteurized juice and wonderful jelly. Four-year vines average about 23 lbs. to the vine. It has the most perfectly regulated vine in the vineyard. It is a honey where the season is of sufficient length. 75c each. Prune short.

Rudelin 3. Gold, midseason or earlier. This is a wonderful variety—it is very vigorous, highly disease resistant and very productive. It is a good table grape and makes a most excellent wine. This is a good one to try. \$1.25 each.

Rudelin 20. Black, midseason. A companion to the above except that table quality is not as good. \$1.25 each.

NEW MISSOURI INTRODUCTIONS

BEAVER Small to medium clusters of medium round berries, black and quite early. It has a most delicious flavor and is really something good. Prune long. \$1.25 each.

BLUE EYE Long cylindrical clusters, medium to large round black berries with blue bloom. Neutral and sweet. Seeds separate. Prune long. \$1.25 each.

ELEVEN POINT Very large compound cluster of medium to large round berries, black with blue bloom. Skin thin, tender, adhering to pulp, which is tender and good. Seeds separate. Flesh is neutral, sweet. Prune long. \$1.25 each.

GASCONADE Large fairly compact compound clusters of medium round berries, black with blue bloom. Skin thin, tender, pulp tender, neutral, slightly spicy, very good. Prune long. \$1.25 each.

NORTH FORK Heavy, clumpy clusters of large to very large sub-ovoid berries, black with blue bloom. Skin thick, tough, pulp tender, seeds separate. Decided *labrusca* flavor. \$1.25 each.

ST. FRANCIS. Medium clusters, berries medium to over-medium. Black with blue bloom. Skin thin and tough. Pulp of good eating consistency, seeds separate and are inconspicuous. Flavor is neutral and sweet. Prune long. \$1.25 each.

NEW YORK INTRODUCTIONS

ATHENS Of the Concord type but ripens a month earlier. An excellent grape of its type. 75c each, 3 for \$2.00.

BROCTON is a richly flavored gold. Good sized clusters. Is rather slow in growth and inclined to bear too heavily. Should be short pruned or long and crop thinned. 75c each, 3 for \$2.00.

BUFFALO An early midseason black, suitable for table and wine. Good resistance, fair vigor, excellent production. Clusters are of good size and quality of fruit is very good. 75c each, 3 for \$2.00, 10 for \$6.00.

EDEN A midseason or earlier black of very pleasing flavor. Clusters are sometimes scraggly, but well worth growing. 75c each.

FREDONIA—an early black of the Concord type. Has medium cylindrical and compact clusters. 75c each, 3 for \$2.00, 10 for \$6.00.

GOLDEN MUSCAT—midseason gold with very large clusters and berries. Should be pruned fairly short as tends to overbear on long pruning here. 75c each, 3 for \$2.00, 10 for \$6.00.

HECTOR—a late midseason red, most excellent in quality. 75c each.

INTERLAKEN SEEDLESS—a promising new seedless grape of excellent quality, gold and early. However, it has winterkilled here consistently, last year at -15. \$1.25 each.

KEUKA—a beautiful lilac red with a wonderful flavor—exactly like passion-fruit. Requires a long season and will stand about -20. 75c each.

ONTARIO—Best early American green grape—a very good one. 75c each.

PORTLAND—Larger in bunch and berry than Ontario but quality not as good. 75c each.

RUBY—A very good midseason red of excellent quality. 75c each.

SCHUYLER—A new early black of excellent quality and probably the only one of this group that might require short pruning. It is a little tender to low temperatures and requires careful spraying for complete protection against mildew. But a very good one. \$1.00 each, 3 for \$2.50, 10 for \$7.50.

SENECA—An early gold of very good quality and production. A most excellent variety. 75c each, 3 for \$2.00, 10 for \$6.00.

SHERIDAN—A late midseason black of nice large compact clusters and berries of the Concord type. Makes wonderful grape butter. 75c each, 3 for \$2.00, 10 for \$6.00.

STEUBEN—Probably the best black originated by this station, everything considered. Midseason. Decided spicy flavor. Good clusters. \$1.00 each, 3 for \$2.50, 10 for \$7.50.

VAN BUREN—A very early black grape of the Concord type. 75c each.

WAYNE—Very large black berries, good clusters. 50c each.

WESTFIELD—ripens slightly before Concord and is especially valuable for its intense color. 75c each, 3 for \$2.00, 10 for \$6.00.

YATES—a promising red grape. Late midseason. Well worthy of trial for table and wine. 75c each, 3 for \$2.00, 10 for \$6.00.

MUNSON HYBRIDS

All priced at 75c each, 3 for \$2.00, 10 for \$6.00, 100 for \$50.00

AMERICA—Midseason black. Medium clusters of medium berries. Totally resistant, very vigorous and productive. Prune long. An excellent jelly and juice grape—also makes an unusual flavored wine that suits a lot of people.

BAILEY—early midseason. Gorgeous clusters of excellent berries. Has big possibilities for market jelly grape.

BRILLIANT—Very early red. Excellent quality. Clusters and berries large. Hardy to -15. Heavy producer.

CAPTIVATOR—Another very early red. Clusters medium, berries large. If you like the labrusca flavor, you will really go for this one.

CHAMPANEL—Midseason black. Extreme vigor and totally resistant to disease. Clusters medium with fairly large berries. Quality fair. It's one vine the Japanese beetle won't touch, according to an authority; and it is resistant to several soil organisms common to the South where other vines cannot live. It is an excellent rootstock for those areas. Even the birds don't bother it here.

DELICATESSEN—A midseason jet-black. Has a beautiful vine—red canes and dark green leaves. It is very vigorous, totally resistant and productive. Makes a wonderful red wine, and is quite hardy.

ELLEN SCOTT—Lilac, late. Very large compact clusters of large berries. Vigorous, but very susceptible to anthracnose. Tremendous producer and runs high in sugar. Should make an excellent white wine.

EXTRA—Midseason black. Another variety I would recommend for the market. It has medium and very compact clusters of medium berries. A bushel basket of these will sell on sight and they make excellent juice and jelly. Might also make a good wine—I haven't tried it yet. It is very productive and one of Munson's best varieties.

FERN MUNSON—A very late jet-black. Hardy to at least -27, has great vigor and productivity. Self-sterile, but Catawba, Muench, or any variety blooming at same time are good pollinators. Should be an excellent market jelly or juice grape. Lots of possibilities for the location with sufficient growing season.

LAST ROSE—A very late red. Enormous clusters of large round berries. Tremendous production. Good vigor. Fair resistance.

LOMANTO—Black, very early. Very hardy, fair vigor, very resistant. Medium to small clusters of medium berries. Makes a wonderful jelly and is used and grown as far north as Canada for wine.

LONGFELLOW—Late midseason, black. Long clusters of good sized berries. Good production. Quality excellent.

MARGUERITE—Very late black. Clusters and berry medium. Is susceptible to disease but easily controlled. Has excellent wine possibilities.

MUENCH—A very late black. Medium to large clusters of medium berries. A wonderful market grape for the South. A single vine on an arbor at an experiment station has produced well over 200 lbs. Is slow to start but is very vigorous thereafter.

RONALDO—A very late white. Large long clusters of good sized oval berries. Quality appears good.

R. W. MUNSON—early midseason black. Self sterile. Concord and Brilliant are good pollinators for it. But has very large compact clusters, berries medium to large, produces very heavily. Is a very beautiful vine with Concord like flavor.

WAPANUKA—an early yellowish-white of good cluster size, medium berry. Strong grower, good resistance, good production. Has a delectable flavor.

MISCELLANEOUS

75c each, 3 for \$2.00, 10 for \$6.00

BETA—A very hardy, vigorous and disease resistant early black. Medium to small clusters of under medium round berries. Good production. Excellent jelly and juice.

CAMPBELL EARLY—Small to large clusters of large, thick-skinned black round berries. Very musky in flavor.

COLUMBIAN—This could be mis-named. It has large long clusters of medium to small black berries of excellent quality. Very heavy producer.

CONCORD—Everyone knows the Concord.

CONCORD SEEDLESS—probably a sport of the Concord. Is a strange acting plant, in that one year it will have perfect clusters of small seedless berries, perfect for that grape cobbler; and perhaps the next season, part of the berries will be seeded. Is hardy, vigorous and productive.

DELAWARE—Probably the best of the old varieties for quality. Excellent to eat, its wine is very good. Small to less than medium clusters of small pink berries. Susceptible to mildew and of less than average vigor. It is worth growing, however.

DUTCHESS—Considered one of the best wine grapes among the old varieties. Early midseason or midseason white. Has been very productive here, with good disease resistance.

LITTLE FRENCH—Big clustered, small berried late midseason black. Quality excellent, production very good.

MISSOURI REISLING—Midseason white. Small to medium clusters of under medium berries. Wine quality excellent.

PALMETTO—a small cluster of over medium berries, very labrusca in flavor. Heavy and regular producer. Very interesting.

PEABODY—A bright blue of early midseason. Medium vigor, fair resistance, susceptible to anthracnose. Beautiful clusters and heavy production. Very good quality for wine and table.

POCKLINGTON—Very early white or green, good sized clusters of large round berries. Frankly labrusca in flavor, it is very productive and regular.

TRIUMPH—A late midseason white. Fair vigor and resistance, big clusters of big berries. Has many desirable qualities.

WITTLE 45—Late midseason black similar to Sheridan. Ripens evenly and is a heavy and regular bearer.

WITTLE 61—Midseason black similar to Concord, of equal or better quality. It ripens evenly here, which Concord does not do. Has better sugar content and acid balance, is equally vigorous, resistant and more productive, better clusters and berry size.

Very small quantities of the following are available: Green Mountain, Herbemont, Iona, Hayes, Cunningham, Golden Giant, King Phillip, Vulcan, Illinois, Diamond, Hercules, Berchmann's, Alice, Greig, August Giant, Red Giant, Flaming Giant, Lady Washington, Geneva, Hubbard, Poverlin, Lollar.

ROOTSTOCKS

Good 1 yr. vines of the following: Teleki 5 BB, 44-53, Richter 57, Richter 99, 101-14, 125-1, 333 EM, 420A, 1202, 1613, 3306, 3309, Australis, Constantia, Dog Ridge, Champanel, Judge, Riparia Gloire, Ruspestris Du Lot. Champanel is priced under Munson hybrids, the rest, per variety—60c each, 10 for \$5.00, 100 for \$35.00.

GRAFTED VINES

We can supply the following varieties on several stocks: Interlaken Seedless, Seibel 9110, Seibel 11803, Seibel 8365, Seibel 14664, Seibel 13669, Ravat 262, Ravat 6, Landot 244, Bokay, Beaver, SV 23-657, SV 15-403, Couderc 7120.

Priced at \$2.00 each. Kindly describe soil when ordering so that best possible stock will be sent.
